Learner

Why use flutter?

- Be highly productive
    - Develop for iOS and Android from a single codebase
    - Do more with less code, even on a single OS, with a modern, expressive language and a declarative approach
    - Prototype and iterate easily

Why use flutter?

cont'd...

- Create beautiful, highly-customized user experiences
    - Benefit from a rich set of Material Design and Cupertino (iOS-flavor) widgets built using Flutter's own framework
    - Realize custom, beautiful, brand-driven designs, without the limitations of OEM widget sets

Core Principles

Everything's a widget

- a structural element (like a button or menu)
- a stylistic element (like a font or color scheme)
- an aspect of layout (like padding)
